SUMMARY

Passionate **Full Stack Developer** specializing in the **MERN stack (MongoDB, Express.js, React, Node.js)**, with a strong focus on building fast, scalable, and user-focused web applications. Currently interning at **Rootsys International**, where I contribute to developing a CRM platform that enhances data management and workflow efficiency. I enjoy turning complex problems into clean, intuitive solutions — from crafting responsive UIs to optimizing backend performance. Always eager to learn new technologies, collaborate with creative teams, and deliver impactful digital experiences that make a difference.

EXPERIENCE

Rootsys International

10/2024 – Present

MERN STACK INTERNSHIP

Kottakkal

I am currently doing an internship at RootSys, working with the MERN stack. As part of my internship, I am contributing to the development of the Audit-Info CRM project. This experience is helping me enhance my skills in full-stack web development and CRM solutions.

SKILLS

Client-Side

- HTML
- CSS
- JS
- React
- NextJs
- Redux
- TypeScript
- Bootstrap
- Tailwind CSS
- jQuery

Server-side

- MongoDB
- Express
- NodeJS
- MySQL
- JWT Authentication
- RESTful API's

Development & Operations

- GitHub
- Postman
- GIT
- Vite
- VS Code
- Vercel
- Render

PROJECTS

Audit-Info CRM

Developed a cross-platform CRM and audit system using the MERN stack, designed for performance, scalability, and an intuitive user experience. The system functions like a student management platform, managing college operations such as admissions, branch management, leads, agents, expenses, and payments. It includes secure JWT-based authentication, role-based dashboards customized for each admin type, and real-time management of records and audits. Optimized RESTful APIs ensure smooth operation across the platform.

ERP Software

Developed an ERP system that unifies and automates key business processes such as products, customers, purchases, expenses, categories, stock, sales, roles, vendors, units, and warehouse management. It offers real-time data access, enhanced reporting capabilities, and centralized management to boost operational efficiency. The system is secure, scalable, and customizable to meet the diverse needs of different industries.

Hospital Website

Developed a hospital website featuring online appointments, doctor listings, and contact information. It includes a user-friendly interface for patients and a secure admin panel for managing data. The system streamlines hospital operations and improves patient engagement.

E-Commerce Website

Developed an E-commerce website with features like product listings, shopping cart, secure checkout. It includes an admin panel for managing inventory, orders, and customer data. The platform is designed for a smooth shopping experience and efficient backend management.
